synopsis

Accomplished technology leader with over a decade of experience spanning product development, engineering leadership, and technical architecture. My career has evolved from backend development to frontend leadership, culminating in CTO and Product Lead roles where I've guided engineering teams to deliver exceptional digital products.

As a technical leader, I've successfully built and scaled mobile applications and web platforms using React, React Native, TypeScript, and C#, while designing robust REST and GraphQL APIs. I excel at implementing scalable cloud infrastructures on AWS and establishing efficient CI/CD pipelines that enable rapid, reliable deployments.

Throughout my career in startups and enterprise environments, I've demonstrated the ability to bridge technical execution with product strategy, mentor engineering teams, and drive technical initiatives that align with business objectives. My approach combines technical excellence with strategic thinking, allowing me to deliver solutions that exceed user expectations while maintaining high code quality through SOLID principles and test-driven development.

Beyond my technical capabilities, I bring a holistic perspective to leadership, fostering inclusive team environments and developing talent. In my free time, I create wellness applications using React Native and explore emerging technologies including blockchain.

experience

2023/09–2025/04 **Hostology (hostology.co.uk)**

London, United Kingdom (Remote)

Product Lead & Senior Full Stack Engineer - Contract

Full Stack Development, Product & Feature Development Lead, Cloud Migration

- Led development of Hostology's front-end architecture and API integration for event management solutions.
- Expanded into product leadership role, collaborating with the CTO on platform strategy and business alignment.
- Executed AWS migration project, significantly improving system scalability and reliability.
- Implemented CircleCI for continuous delivery, streamlining the deployment process.

Tech Stack: *React, TypeScript, Node.js, GraphQL, C# ASP.NET, CircleCI, AWS, GitHub, NVM (Node Version Manager)*

Jordi Amat

2020/02–2020/07 **Tinto (tintoapp.com)**

London, United Kingdom (Remote)

CTO (React Native, Typescript, Node & AWS)

Technical Leadership, Engineering Management, Product Strategy

- Led engineering team and technical strategy for a wellness app supporting women in motherhood.
- Mentored junior AI engineers, enhancing their technical skills and decision-making abilities.
- Collaborated with CEO on product planning and feature roadmap prioritization.
- Designed and implemented new product features focused on user experience improvement.
- Executed infrastructure migration to in-house servers, improving security and operational control.

Tech Stack: *React-Native, TypeScript, Redux, Detox, Jest, Node.js, Docker, Agile Methodologies, AWS*

2019/04–2019/08 **Just Insurance (just.insure)**

London, United Kingdom (Hybrid)

Senior Frontend Engineer (React Native, Typescript, Node & AWS) - Contractor

Mobile Development, System Architecture, DevOps Implementation

- Built React Native mobile apps for pay-per-mile car insurance, enhancing performance across iOS and Android platforms.
- Developed advanced vehicle tracking systems with real-time data processing for usage-based insurance metrics.
- Implemented CI/CD pipeline using CircleCI, fastlane, and integrated crash reporting through Crashlytics.
- Managed iOS/Android release processes including certificates, provisioning profiles and app store submissions.
- Led migration of React Native codebase and integration of critical services (Auth0, Sentry, Firebase).

Tech Stack: *React-Native, Jest, TypeScript, Navigation, Styled Components, Redux, Husky, Enzyme, Cypress, NodeJS, Firebase, PostgreSQL, Heroku, CircleCI, Agile*

Jordi Amat

2016/04–2018/11 **Movebubble (movebubble.com)**

London, United Kingdom (Hybrid)

Frontend Lead & Full Stack Engineer (React Native, React, Node, C#) - Full Time

Frontend Leadership, Full Stack Development, Mobile App Architecture

- Progressed to full stack development with frontend technologies.
- Led development of Negotiator App using React Native, evolving it from prototype to core product.
- Built and maintained Renter app (React) and backend systems for property rental platform.
- Implemented rapid deployment pipeline, reducing release time to minutes for seamless updates.
- Mentored junior developers in full-stack technologies and best practices.
- Advanced to technical leadership.
- Collaborated in GV Design Sprints and experimental design sessions to enhance product innovation.

Tech Stack: *React-Native, ReactJS, Node, Typescript, GraphQL, Cypress, Jest, C# ASP.NET, TDD, RavenDB, MongoDB, SQL, Octopus Deploy, Scrum, GV Design Sprint*

2014/12–2016/04 **PWC PricewaterhouseCoopers**

London, United Kingdom (Onsite)

Backend Engineer (C#) - Full Time

API Development, Enterprise Architecture, System Integration

- Designed and built C ASP.NET Web APIs for enterprise tax application systems.
- Implemented ESB/SOA architecture with EventSourcing and RabbitMQ, optimizing file processing performance.
- Developed employee tracking application using AngularJS, Web API, Entity Framework and SQL Server.
- Created data integration solution between tax application and data warehouse using EventSourcing pattern.
- Conducted performance testing and optimization, identifying and resolving system bottlenecks.
- Established CI pipeline with quality gates and automated deployments via Octopus Deploy.

Tech Stack: *C# ASP.NET Web API, TDD, JavaScript, PL/SQL, SQL Server, EF, MongoDB, EventSourcing (ESB), TeamCity, Octopus Deploy, Agile/Scrum*

Jordi Amat

certified

2013/01–2014/11 **MRW (mrw.es)**
Back-End Engineer (C#) - Full Time

Barcelona, Spain (On site)

Healing & Holistic Therapy

Theta Healing Practitioner &
Instructor
Access Consciousness
Practitioner
Family Constellations
Facilitator
Sacred Earth Medicine
Facilitator
Reiki Teacher
Therapeutic Counselling

Yoga & Embodiment Instructor

200h Kundalini Yoga
60h Mind & Meditation Yoga
200h Ashtanga Vinyasa Yoga
100h Yin Yoga
Laughter & Children Yoga

Architecture Design, Web Application Development, System Integration

- Implemented Service-Oriented Architecture (SOA) with EventSourcing and CQRS patterns for package delivery management.
- Integrated 40+ autonomous components to create modular, scalable logistics application.
- Led integration between V2 and V3 web applications, ensuring consistent user experience across platforms.
- Debugged and optimized EventSourcing mechanisms to improve reliability of event-driven processes.
- Applied Domain-Driven Design and Test-Driven Development methodologies for high-quality code delivery.
- Worked under senior architecture mentor to develop advanced software engineering expertise.

Tech Stack: *C# ASP.NET MVC, DDD, TDD, JavaScript, jQuery, Knockout, MongoDB, SQL Server, EventSourcing (ESB, SOA, CQRS), RabbitMQ, TeamCity, Agile/Scrum*

education

2009–2013

Bachelor's Degree in Computer Software Engineering
Polytechnic University of Catalonia, Barcelona School of Informatics

UPC - FIB, Barcelona, Spain

sabbatical

2017–2023

Personal & Professional Development

During a structured sabbatical from the technology sector, I invested in personal growth and leadership development through:

- Certified in multiple wellness modalities including mindfulness training and therapeutic coaching (500+ hours).
- Developed group facilitation and leadership skills while coaching diverse international clients.
- Honed problem-solving abilities through adventure challenges including high-altitude trekking.
- Maintained technical skills by developing wellness applications using React Native ecosystem.
